PUBLIC UTILITY OF
FILING CLERK

To: Public Utility Commission of Texas

I am writing this letter of concern to you to request that our smart meter that reads the electricity would be put back to the old manual meter. My family is electromagnetically sensitive and this meter puts out a lot of radiation that can be felt by my family members. My son's room is right next to the smart meter and is being potentially harmed by the emitting of continual electromagnetic radiation as the electric company continually pulls "readings" several times a day.

I realize that Texas House passed a law in 2005 #2129 which states that smart meters must be installed in all Texas homes. I am not for this, and would like to "opt out" and see any testing they have done to show that this technology is "safe" for its citizens. I do not believe it is safe.

Sincerely

Miriam F Snider
